

CtC · RCMS · IGER Seminar

“Synthesis and Structure of Group 16 systems”

Lecturer : Prof. J Derek Woollins
(University of St Andrews)

Date : Wed. 31st Aug. 15:30 – 17:00

Place: Chemistry Gallery

This talk will describe the synthesis, structural studies and applications of sulfur, selenium and tellurium compounds. Small molecule S-N chemistry, metal-S-N chemistry, P-S, P-Se and P-Te heterocycles as well as imidophosphinate complexes will be described.

Recent work on developing automated chemical crystallography (joint with A M Z Slawin) will also be described

Contact: Kunio Awaga (ext. 2487)
